RAPID DEPLOYMENT LIVE CCTV MONITORING**

- FULLY PORTABLE
- ECO FRIENDLY
- NO REFUELING
- NO NOISE POLLUTION

Detects intruders on your properties
protecting your site and equipment in real time

smart
ECO TOWER CCTV

HOW IT WORKS

1

Your site or property is protected by our Smart Cameras and can detect any unauthorised activity

2

Live Audio Warnings are issued by our Monitoring Team directly to the threat on site

With **NO POWER REQUIRED** on your site our fully portable **Smart ECO Tower CCTV** solution can be rapidly deployed **ANYWHERE**. Recording activity 24 hours a day, it provides a live video detection & verification feed directly to our own monitoring centre. When a CCTV video alarm is activated by someone moving in front of any of the tower cameras our controllers will view your site or premises live to verify any obvious risk to your property or equipment.

Our **Smart ECO Tower CCTV** solution allows our controllers to relay a **LIVE AUDIO WARNING** to the threat in real time. In the event that trespassers are on site then our controllers can contact your key holders and the Gardaí immediately ensuring the fastest possible response.

OUR ECO TOWERS COME FULLY MONITORED & MAINTAINED FOR JUST ONE WEEKLY RATE OF €299*

* Terms & Conditions apply

3

Smart Monitoring ensures your site or property are protected and monitors the threat

4

Security services are contacted directly and dispatched to your site or premises
